## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Objections***

Claim 6 is objected to because of the following informalities: It appears that —the group consisting of:—should be inserted between “from” and “a” in line 2. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brosseau et al. in view of Dance et al.

Regarding claims 1-4 and 6-8, Brosseau et al. teaches an interactive computer-assisted surgery system including a computer (12) having memory (14), display means (18) controlled by the computer for displaying a patient's tibia and femur in flexion and/or extension, registration means (36, 38, 42) and detector (22) means. Although

Brosseau et al. teaches flexing and extending the leg of the patient (col. 7 lines 12-16), a tensor means is not disclosed explicitly. Dance et al. teaches a computer-assisted surgery system including *inter alia*, registration means (36, 42), detector means (38) and tensor means comprising a mechanical arm (34). See col. 4 line 61 – col. 5 line 5. It would have been obvious at the time the invention was made to a person of ordinary skill in the art to use a tensor means as taught by Dance et al. in the invention as taught by Brosseau et al. to provide a more controlled and accurate means for repositioning the leg of a patient during a surgical procedure. Moreover, lacking any criticality, the type of marker and detector system used would have been an obvious matter of design choice to a person of ordinary skill in the art without undue experimentation (see e.g., Dance et al. col. 6 lines 32-39).

### ***Allowable Subject Matter***

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
